Education

University of Michigan - Ann Arbor; Honors Student

Expected Graduation: May 2029

B.S. Political Science and Computer Science

GPA: 3.9/4.0

Relevant Coursework: Intro to Agent-Based Modeling · Honors Computing's Impact on Justice · Calculus I & Calculus II · Elementary Programming Concepts · Honors Intro to World Politics · Intro to Comparative Politics

Experience

Founder - IRENE

Jan 2026 — Present

- Built a multimodal OCR + CV pipeline, reducing sorting errors and improving accuracy across 100+ volunteer workflows
- Automated data collection and retraining, enabling continuous model improvement and scalable dataset growth
- Improved volunteer sorting efficiency by 50% for 100+ weekly users via optimized inference and UI-assisted validation
- Designed a traceability system linking predictions to logistics metadata, enabling end-to-end auditability

Part-Time Executive - Einsteins Square

Feb 2024 — Jul 2025

- Audited 10+ EdTech platforms by mapping data flows and identifying compliance risks under COPPA/FERPA frameworks
- Structured data governance workflows by standardizing contracts for 50+ educators, ensuring scalable compliance processes
- Analyzed KPI-driven operational data to identify inefficiencies and improve compliance and audit readiness

Legal Associate - Hedman Law Firm

Jul 2023 — Aug 2023

- Built a data-driven cryptocurrency valuation dashboard for a \$200M lawsuit, integrating market and transaction datasets
- Structured and processed IP datasets for WIPO filings, improving cross-border registration workflows
- Analyzed regulatory and entity data to support incorporation and compliance filings across Hong Kong-Estonia jurisdictions

Research Assistant - Sacrifice for the State: Identification or Disillusionment?

Jan 2026 — Present

- Designed an OCR + data processing pipeline to clean and structure ~3M historical records into a queryable dataset
- Building and publishing the first large-scale dataset of American WW1 soldiers' service data for downstream research use
- Performing statistical analysis on millions of observations to evaluate how soldier deaths influenced political support

Appointed Representative - LSA Student Government

Sep 2025 — Present

- Drafting bylaw and constitutional amendments for the Internal Review Committee
- Proposed an AI-authorship validation framework aiming to be adopted by the Academic Judiciary Committee, protecting academic integrity for 20,000+ students

Projects

Automating Scheduling RPA System, Einsteins Square

Dec 2025 — Feb 2026

- Built deterministic RPA system automating class scheduling on Outschoool using Python, Pydantic, pandas, Playwright
- Improved efficiency by ~85% across 30+ teachers, increasing revenue by ~15% and reducing overhead cost by ~50%

Assessing Federal Litigation Success Disparities, University of Michigan (Prof. Miller)

Aug 2025 — Dec 2025

- Created a RAG database agent which leverages pandas and SQL, developed via LangChain and Azure OpenAI
- Constructed a comprehensive technical report discussing the systematic biases discovered in the ~60M data-set

Evaluating Compliance with LOAC, University of Michigan (Prof. Morrow)

Aug 2025 — Dec 2025

- Qualitative assessment of the 1991 Gulf War, the 2006 Lebanon War and the concurrent Russia-Ukraine War
- Research on state compliance with laws of armed conflict, focusing on predicting the treatment of civilians and reputation as a substitute for reciprocity

Technical Skills

Programming Languages: C++ · Python · TypeScript · SQL

Infrastructure & Tools: Docker · Git/GitHub Actions

Other: NumPy · Pandas · PostgreSQL · PyTorch · scikit-learn · TensorFlow · Pydantic · Playwright

Certifications

Google - AI Agents Intensive Course · Stanford - Supervised Machine Learning · Microsoft - RAG Database Agent Course · LandingAI - Agentic Document Extraction · AGI Inc - AI Browser Agents · Harvard Summer School - The Governance of Emerging Technologies · Oxford Summer School - Criminal Law
